Technical Skills

- C, Python, Java, C++, JavaScript
- SQL, MySQL
- HTML, CSS, PHP
- VHDL, Verilog
- Wordpress, UI/UX
- Generative AI, Prompt Engineering, Context Engineering

Soft Skills

- Teamwork
- Adaptability
- Analytical Thinking
- Problem Solving

Languages

Greek - Native
English - ECPE
French - B2

Myrto Deligianni

Computer Engineering and Informatics - University of Patras

Projects & Experience

Thesis (May 2025 - Present)

Researching the use of AI-generated personas to simulate diverse user behaviors and accessibility needs during website evaluation. The project focuses on assessing usability, accessibility, user experience and overall website effectiveness through persona-based analysis.

E-CAD (March 2024 - June 2024)

Designed and implemented a complete VGA display controller system in Verilog, deployed on a 100 MHz FPGA using the XSA and XST4 boards. Developed six independent screen sections with adjustable RGB values controlled through keyboard inputs, enabling dynamic color updates with boundary checking.

E-Commerce (June 2024 - September 2024)

Built an accessible e-commerce platform using WordPress and WooCommerce. Implemented product pages, shopping flow, and site customization, with a focus on accessibility, usability, responsive design and user experience.

Distributed Systems (January 2024 - February 2024)

Implemented distributed communication models in Python using RabbitMQ, covering shared queues, task assignment, message filtering and local event recording. Processed distributed temperature data to calculate global minimum, average and maximum values.

Web (January 2022 - September 2022)

Developed a crowdsourcing web platform using PHP, HTML, CSS and MySQL, applying UI/UX principles, API integration and database design and implementation. Users could search for stores, submit timestamped foot-traffic reports, report positive COVID-19 cases and view an interactive heat map with real-time and estimated traffic data.

Education

Computer Engineering and Informatics Department (CEID) - University of Patras

(October 2018 - Present)
